A blog about heat transfer and applied thermodynamics. another rule-of-thumb for the effect of runner weight on pace. There is a fair amount of wild speculation, rigorous study, anecdotal experience, and intuitive assertion about this topic, but a lot of conclusions seem to center around a time penalty of 1-4 seconds per mile per pound of body weight.

## **Heat Transfer and Applied Thermodynamics**

A blog about heat transfer and applied thermodynamics. In the last two posts, we considered the cooling of the exit temperature of a hot water tank with a given flow rate and heat input rate, and thought about recharge times once the hot water withdrawal was stopped. However, in real life you'd keep turning up the proportion of hot water as long as you could in order to keep your shower
