Overview. You will learn: how to use the Map Viewer to create a web map that can be used in your apps. The Map Viewer allows you to create, edit and save web maps in ArcGIS Online. This is handy for developers because it allows you to compose maps interactively and then load them into your applications, reducing the amount of code you have to write.

## **Create a web map | ArcGIS for Developers**

An interactive map is a map in digital form that allows you to manipulate the map display and

query the map to get the information you need using a set of tools provided with the map. Interactive maps are created using GIS software, then distributed to users, usually over a computer network.
