Macro security is a key feature in Excel. The reason is that VBA is a powerful language — so powerful that it's possible to create a macro that can do serious damage to your computer. A macro can delete files, send information to other computers, and even destroy Windows so that you can't even start your system.

Understanding Macro Security for Excel 2016 VBA ...

To record a macro. Open Excel to a new Workbook and choose the Developer tab in the ribbon. Choose Record Macro and accept all of the default settings in the Record Macro dialog box, including Macro1 as the name of the macro and This Workbook as the location. Choose OK to begin recording the macro. Note how the button text changes to Stop Recording. Choose that button the instant you complete the actions that you want to record.

Getting started with VBA in Office | Microsoft Docs

Using Excel Macros can speed up work and save you a lot of time. One way of getting the VBA code is to record the macro and take the code it generates. However, that code by macro recorder is often full of code that is not really needed. Also macro recorder has some limitations.
