Robots Are People Too: How Siri, Google Car, and ...

Design influences how prepared humans are to interact with the robot. Give it something resembling a face, and movements that begin to mirror human actions, then people become more interactive, and project feelings and narratives onto that inanimate object. This brings into play concerns about the extent to which humans can become attached to robots.

DEEP MACHINE LAB - Robots are people, too

Raccoons deserve love, robots are people too. The Earth stays afloat on the buoyancy of your kindness. That's me and my robot. My setting is somewhere in the middle, a flat-line. Some might say emotionless, but I say even-keeled. I scavenge what I need and move on. I don't dwell. I don't cry to the heavens about a stain on the carpet.
